Agile Project Management - AltexSoft

Management (CCPM) Project delays are usually caused by resources that aren't available when you need them. CCPM avoids that by building a project schedule that first identifies a "critical chain" of tasks and then reserves resources for those tasks. Your project timeline may be longer, but you've got a higher probability of predicting realistic deadlines.

The Beginner's Guide - Your online project management

Implementing Agile: Creating an Agile Environment talks about critical factors to consider when creating an agile environment such as servant leadership and team composition. Implementing Agile: Delivering in an Agile Environment discusses how to organize a team and common practices the team can use for delivering value on a regular basis. It provides examples of empirical measurements for the team and for reporting status.
