### **Swaddling and the Risk of Sudden Infant Death Syndrome: A**

Sudden infant death syndrome (SIDS), also known as cot death or crib death, is the sudden unexplained death of a child less than one year of age. Diagnosis requires that the death remains unexplained even after a thorough autopsy and detailed death scene investigation. SIDS usually occurs during sleep. Typically death occurs between the hours of 00:00 and 09:00.

A few comments to add to this excellent article: 1. When several children died following DPT vaccination in Japan in the 1970s, the government stopped vaccinating children under 2 yrs of age and the country rocketed to #1 in infant mortality rankings, having the lowest death rate of children under 1 year of age.

An infant (from the Latin word infans, meaning "unable to speak" or "speechless") is the more formal or specialised synonym for "baby", the very young offspring of a human. The term may also be used to refer to juveniles of other organisms. A newborn is, in colloquial use, an infant who is only hours, days, or up to one month old. In medical contexts, newborn or neonate (from Latin, neonatus ...

It is important that women seek medical care right away in case of a miscarriage or stillbirth.. When a woman miscarries (the pregnancy ends spontaneously before 20 weeksâ€™ gestation) or has a stillbirth (gives birth

to an infant with no signs of life at or after 20 weeksâ€™ gestation), she needs immediate medical care to prevent complications. There are increased risks of bleeding and/or ...
