(OEIS A079586) is known as the reciprocal Fibonacci constant.. Yuri Matiyasevich (1970) showed that there is a polynomial in x, y, z , and a number of other variables w_1, w_2, \dots having the property that iff there exist integers a, b, c, \dots such that $P(a, b, c, \dots) = 0$. This led to the proof of the impossibility of the tenth of Hilbert's problems (does there exist a general method for solving Diophantine equations?) by ...

In computer science, comparator networks are abstract devices built up of a fixed number of "wires", carrying values, and comparator modules that connect pairs of wires, swapping the values on the wires if they are not in a desired order. Such networks are typically designed to perform sorting on fixed numbers of values, in which case they are called sorting networks.

Sorting network - Wikipedia

Study Island is a leading academic software provider of standards-based assessment, instruction, and test preparation e-learning programs.
