In general, bootstrapping usually refers to a self-starting process that is supposed to proceed without external input. In computer technology the term (usually shortened to booting) usually refers to the process of loading the basic software into the memory of a computer after power-on or general reset, especially the operating system which will then take care of loading other software as needed.

Bootstrapping - Wikipedia

Firms are usually best off with a portfolio that has a balance of firms in each category. The cash cows tend to generate cash but require little future investment. On the other hand, stars generate some cash, but even more cash is needed to invest in the future "for research and development, marketing campaigns, and building new manufacturing facilities.
