Chapter 10: Vehicle Systems; Note: If you are not at all familiar with basic electronics, you might find it easier to understand this chapter if you read chapter 12 first. There are two or three main objectives for people who create automotive devices â€“ increasing the mpg performance and reducing the harmful emissions are the top two priorities, while running the vehicle on water alone is ...

Zero-point energy (ZPE) is the difference between the lowest possible energy that a quantum mechanical system may have, and the classical minimum energy of the system. Unlike in classical mechanics, quantum systems constantly fluctuate in their lowest energy state due to the Heisenberg uncertainty principle. As well as atoms and molecules, the empty space of the vacuum has these properties.
