In 3D computer graphics, 3D modeling is the process of developing a mathematical representation of any surface of an object (either inanimate or living) in three dimensions via specialized software. The product is called a 3D model. Someone who works with 3D models may be referred to as a 3D artist. It can be displayed as a two-dimensional image through a process called 3D rendering or used in a ...

In many ways, the techniques of design thinking are well suited for the task of generating a capability model. In most of the situations I've been aware of, stakeholders for a capability model have never seen one before and have no idea how to use one. It's tough to assist in designing something that you've never used before.
